NOTES:

1. MA 151 Probability and Statistics is necessary and will fulfill the core math requirement.
2. CH 161/L Principles of Chemistry I may be taken in place of CH141/L Intro to Biological Chemistry. If CH 161/L is substituted, it must be taken in the fall of the freshman year.
3. PS 111 Public Policy is recommended.
4. At least fifteen hours are required from: AG 251, 322/L, 323, 325/L (or BA 331), 351/L, 365/L, and 373. AG 373 is recommended for those pursuing graduate education in a field related to animal science.
5. Students are required to have 120 hours to graduate, including a minimum of 36 hours of 300+ courses.
6. Students who have taken AP exams, early-entry or dual-credit courses may be able to lighten the number of credits needed during a given semester and may even eliminate the need for summer coursework. The Registrar's Offices' evaluation of prior coursework will help students and their academic advisors plan out degree requirements.

*Indicates alternating year course.

Underlining indicates required for major.
