NOTES:

1. Chemistry majors not yet placing into MA 171/172 should take MA 141 in the Spring of the freshman year (*see mathematics placement policy in Catalog under Academic Information*).
2. In addition to courses required for the chemistry major, the minimum courses recommended for preparation for medical, dental, optometry, or veterinary school and for the appropriate standardized admission test include BI 161/L, 222/L, 321/L, 342/L. Biology courses in italics are recommended but not required for the major. Other recommended courses may include BI 241/L and 242/L (not included in the above plan); 371/L, 432/L, 462/L; PY 111; and SO 111 (*see Degrees and Programs, Pre-Medical Study in Catalog*). The PY 111 and SO 111 courses also fulfill the core social science requirement.
3. Chemistry majors must complete chemical research for graduation. CH 490 should be taken during the summer before the student's senior year. It is imperative that the student apply to summer programs in the winter of the junior year, at the latest. Application in the sophomore year is encouraged.
